Instruction

DIANE M. NEIKAM

Supervisor of Elementary Curriculum and
Instruction

Dear Parents and Guardians,

Go Math! is an elementary mathematics program published by Houghton Mifflin Harcourt. It has strong Differentiated Instruction components for each chapter and lesson, as well as information to address each of the three tiers in Response to Intervention and Instruction. **Go Math!** incorporates multiple forms of best practices some of them being teaching mathematics through problem solving, reasoning, connections, communication, and multiple representations.

Technology tools and resources available with the **Go Math!** program enhance the teaching and learning of mathematics. The eStudent Edition allows for access at school or home. It provides audio reinforcement for each lesson as well as point-of-use links to Animated Math Models. There are multiple other technology components including but not limited to iTools, Multimedia eGlossary, Real World Videos and HMH Mega Math. To gain access to the site, log in to:

User Name – Student ID #

Password - gomath

Teachers often use Math On the Spot Videos to introduce the daily lesson. Many parents have also found the videos can be helpful when working with their child at home. You can access the videos from the district website or at:

https://www-k6.thinkcentral.com/content/hsp/math/gomath2015/na/grk-6/on_the_spot_videos_9780544251519_/index.html

We look forward to partnering with you as we embark on our journey through **Go Math!**

Sincerely,

Diane Neikam

Curriculum Supervisor of Elementary Education
